208. STALLION BREEDING REPORT

(a) The owner, authorized agent or lessee of every American Quarter Horse stallion must make a written report showing the names, registration numbers and breeding date(s) of exposure of all registered American Quarter Horse and Thoroughbred mares exposed to said stallion since the previous November 30, and the owner, authorized agent or lessee of every registered Thoroughbred stallion must make a written report showing the names, registration numbers, and breeding date(s) of exposure of all registered American Quarter Horse mares exposed to said stallion since the previous November 30. Such report must be postmarked or delivered to AQHA on or before November 30 of the breeding year. Proper fees as per rule 222 must be remitted. A payment of \$10 in addition to the usual filing fees will be required for each mare reported after November 30 of the breeding year. Such reports for stallions standing south of the equator must be postmarked or delivered to AQHA's office on or before June 30 of the breeding year, and a payment of \$10 in addition to the usual filing fees will be required for each mare reported after June 30 of the breeding year.

(b) This report shall include all mares owned by the owner of the stallion as well as mares owned by other parties. Mares bred with cooled transported semen or frozen semen must be designated on the report. The report shall be made on a form provided free of charge by AQHA.

(c) Thirty days (30) must elapse between exposure to different stallions for foals to be eligible for registration. Refer to rule 227(c)(1)(2).

(d) If the stallion for which the report is being filed is a Thoroughbred, a photocopy of both sides of that Thoroughbred's registration certificate issued by The Jockey Club of North America, or any Thoroughbred registry recognized by The Jockey Club of North America, must be recorded with fee in AQHA's office showing the correct ownership as required by rule 202(c).

(e) Proper fees as per rule 222 must be remitted.

Rule 209. ARTIFICIAL INSEMINATION, COOLED TRANSPORTED AND FROZEN SEMEN

(a) Frozen semen may not be used beyond the calendar year of the stallion's death.

(b) If cooled semen or frozen semen is to be transported for the purpose of breeding a mare or mares at any place other than the premises of collection the stallion owner or lessee and mare owner must both complete their respective portions of the collection/insemination certificate which must accompany the shipment of cooled semen or frozen semen to the mare owner. See (d) below.

(c) A collection/insemination certificate form will be provided by AQHA, at no charge, to the stallion owner or agent. The collection/insemination certificate must be completed in part by the stallion owner/lessee and accompany the semen transported to the mare owner or agent. This certificate is not to be confused with a breeder's certificate (see rule 211) and cannot be used as such.

(d) Upon receiving the semen and the collection/insemination certificate from the stallion owner, the owner or lessee of the mare for which semen is received shall complete and sign the certificate, including the date of insemination. This certificate (not a breeder's certificate) shall be sent in time to be received by the AQHA office within 15 days from the date of insemination. Any subsequent breeding in the same breeding season will require another certificate.

(e) The stallion owner or lessee shall clearly distinguish those mares bred using cooled transported semen or frozen semen and those mares bred immediately following collection, hand bred or pasture bred on the Stallion Breeding Report (see rule 208).

(f) Any foal resulting from the use of cooled transported semen or frozen semen must have its pedigree verified by genetic testing, including sire, dam and foal and/or by other genetic testing as AQHA deems necessary, all expense of which shall be the registration applicant's. In addition, the Executive Committee has the authority to require parentage verification by genetic testing of all foals born on any premise receiving transported semen.

(g) Any foal resulting from the use of cooled transported semen or frozen semen shall not be registered without a transported semen or frozen semen breeder's certificate (not the breeder's certificate on the registration application). Such breeder's certificates are available at no charge to stallion owners upon request.

(h) The Executive Committee has the authority to send representatives to inspect the premises and practices of any person or breeding establishment using artificial insemination and no person shall refuse, upon reasonable request, full access to said premises.

(i) When a foal is produced by transported semen, such fact will be listed on its registration certificate.
